

### Digital Display

Displaying the Impulse current from 0.20 to 5.0mA  
Pulse LED (Yellow) indicates that the device is ready.

### Battery LED

Indicates low battery & battery should be replaced.

### Frequency

The frequency can be toggled between 1Hz and 2Hz by holding the concerned key for 2 sec. The default frequency is 1Hz.

**Beep Tone** is heard briefly during Self Test and after that it is triggered only when the circuit is closed.

## Specifications:

Compact  
User-friendly & light weight  
Constant current stimulator – monophasic  
Audio visual indication for pulse delivery  
Large 7 segment LED display  
Battery low indicator

Pulse Amplitude : 0.2mA to 5.0mA  
Pulse Width : 0.1m sec  
Pulse Frequency : 1Hz or 2 Hz switchable (Default 1 Hz)  
Impedance : 0 to 5K Ohms  
Display : 3 Digit 7 segment large display  
Resolution : 0.01mA or 0.1mA  
Battery : 9V, Type 6LR-61 or 6F22  
Indication : Red LED flashing indicates low battery  
Yellow LED flashing with beep sound  
for delivery of each pulse when the  
circuit is closed
